network of remedial public spaces

Tours/Saint-Pierre-Des-Corps (fr) | 2015

Type:
Concours / Workshop

Thèmes:
Espace public, Urbanisme, Architecture

Equipe:
bau[15]
avec la participation de Maëna André, Architecte

Client:
Communauté d'agglomération Tour(s) Plus
Institut pour la Ville en Mouvement - Vinci Autoroutes - ATU

Taille:
XXL

Statut:
Projet Lauréat, Études en cours

Publication:
Numéro 400 de la revue Urbanisme, mai 2016
Ressources Urbaines : Metis presse, 2016

Exposition:
Passages
espaces de transition pour la ville du 21e siècle, organisé par l'IVM
Nouvelles Richesses, Pavillion Français Biennale de Venise 2016

Présentation:
cycle de conférence «Plateforme de la création architecturale»,
Cité de l'architecture, Paris

Minor interventions for major transformation

The territory of Tours and Saint-Pierre des Corps is typical of a contemporary metropolitan condition where the big mobility infrastructures and residential environments have ultimately come into conflict. Marked on all sides by powerful fracture lines – the motorway, but also railway tracks and walls – these environments nevertheless survive, but now aspire to regain greater coherence, greater permeability. The fine pattern lines of day-to-day travel itineraries accommodate these fractures as best they can, passing along them, by them, above them, below them…

Far from reinventing the whole urban system, the project's strategy is to introduce micro-porosities at key points situated at the intersection between lines of fracture and lines of use. The task is to identify these nerve centres, analyse them and improve conditions of passage, or even create new ones.
